SYNTHETIC MORTGAGE CASE FILE

Document ID: ANX-MTG-0002
Application ID: ANX-2026-0042
Document Version: 1.0
Creation Date: 19 October 2026
Purpose: RAG Retrieval, Document Intelligence, and Underwriting Decision-Support Testing

1. CASE SUMMARY

1.1 Case Overview

Document ID: ANX-MTG-0002

Application ID: ANX-2026-0042

Borrower Name: Maria Elena Rodriguez

Property Address: 7621 Cedar Ridge Lane, San Antonio, TX 78240

Application Date: 14 October 2026

Loan Purpose: Purchase of primary residence

Loan Product: Conventional fixed-rate mortgage

Current Application Status: Pending underwriting review

1.2 Loan Application Details

Field	Value
Purchase Price	$350,000
Requested Loan Amount	$280,000
Down Payment	$70,000
Down Payment Percentage	20%
Illustrative Interest Rate	6.750%
Loan Term	30 years
Property Type	Single-family detached residence
Occupancy Type	Primary residence

1.3 Case Objective

The purpose of this case is to test whether ANexus can retrieve borrower information, calculate financial ratios, compare the results with defined criteria, and provide evidence-backed explanations with source-page citations. The system should distinguish between documented facts, calculated values, illustrative criteria, and information that is not available in the source document.

2. EMPLOYMENT AND INCOME

2.1 Employment Verification

Employer: Northstar Medical Supply LLC (fictional)

Job Title: Operations Coordinator

Employment Status: Full-time, salaried

Employment Start Date: 6 March 2021

Employment Verification Date: 12 October 2026

Annual Base Salary: $96,000

Gross Monthly Base Income: $8,000

The employment information in this case is provided as synthetic verified data for testing document extraction and income analysis.

2.2 Variable Income -- Annual Bonuses

The borrower has the following documented synthetic bonus history:

Year	Annual Bonus
2023	$6,000
2024	$8,000
2025	$10,000

Total bonuses over three years: $24,000

Average annual bonus: $24,000 ÷ 3 = $8,000

Illustrative qualifying monthly bonus: $8,000 ÷ 12 = $666.67

2.3 Total Qualifying Monthly Income

Income Component	Monthly Amount
Base Salary	$8,000.00
Qualifying Bonus	$666.67
Total Qualifying Gross Monthly Income	**$8,666.67**

For this test case, the average bonus is treated as qualifying income. A real lender would apply its own documentation requirements and income-qualification policies.

3. CREDIT PROFILE AND MONTHLY OBLIGATIONS

3.1 Credit Profile

Representative FICO Score: 715

Credit Report Date: 11 October 2026

Bankruptcy: No bankruptcy is reported in the synthetic review period.

Foreclosure: No foreclosure is reported in the synthetic review period.

These statements describe only the information provided in this fictional case file.

3.2 Monthly Financial Obligations

Obligation	Monthly Amount
Auto Loan	$420
Student Loan	$280
Credit Card Minimum Payment	$120
Personal Loan	$0
Proposed Mortgage Principal and Interest	$1,816
Property Taxes	$365
Homeowners Insurance	$135
Homeowners Association (HOA) Dues	$75
Total Monthly Obligations	**$3,211**

3.3 Debt-to-Income Ratio (DTI)

DTI measures the proportion of gross monthly income allocated to monthly debt obligations under the calculation used in this case.

Formula: DTI = (Total Monthly Obligations ÷ Gross Monthly Qualifying Income) × 100

Calculation: DTI = ($3,211 ÷ $8,666.67) × 100

Calculated DTI: approximately 37.05%

3.4 Interpretation

The calculated DTI is approximately 37.05%. The illustrative maximum DTI for this test case is 43%, as specified on Page 7.

Therefore, the borrower's DTI is below the illustrative maximum.

The proposed payment figures are synthetic estimates, not a mortgage quote or a confirmed payment obligation.

4. ASSETS AND FUNDS TO CLOSE

4.1 Reported Assets

Asset Type	Reported Balance
Checking Account	$24,000
Savings Account	$41,500
Brokerage Account	$32,000
Retirement Account	$68,000
Total Reported Assets	**$165,500**

4.2 Estimated Funds Required to Close

Expense	Estimated Amount
Down Payment	$70,000
Closing Costs	$8,750
Prepaid Taxes and Insurance	$2,750
Total Estimated Cash to Close	**$81,500**

4.3 Liquid Assets

For this synthetic case, liquid assets are defined as the combined balances of checking, savings, and brokerage accounts.

Liquid Assets = $24,000 + $41,500 + $32,000

Total Liquid Assets: $97,500

Remaining Liquid Assets = Liquid Assets − Estimated Cash to Close

Remaining Liquid Assets = $97,500 − $81,500

Estimated Remaining Liquid Assets: $16,000

Retirement assets are excluded from this example's liquid-asset reserve calculation.

4.4 Estimated Reserves

For this test case, reserve months are calculated using the remaining liquid assets divided by the proposed monthly housing payment.

Proposed Monthly Housing Payment: $1,816 + $365 + $135 + $75 = $2,391

Estimated Reserves = $16,000 ÷ $2,391

Estimated Reserves: approximately 6.69 months

5. PROPERTY AND LOAN-TO-VALUE

5.1 Property Details

Property Address: 7621 Cedar Ridge Lane, San Antonio, TX 78240

Property Type: Single-family detached residence

Occupancy: Primary residence, **Year Built:** 2006

Living Area: 1,840 square feet

Bedrooms: 3, **Bathrooms:** 2

5.2 Property and Loan Values

Field	Amount
Purchase Price	$350,000
Appraised Value	$360,000
Requested Loan Amount	$280,000
Difference Between Appraisal and Purchase Price	$10,000

The appraised value is $10,000 higher than the purchase price.

5.3 Loan-to-Value Ratio (LTV)

For this synthetic test case, LTV is calculated using the lower of the purchase price and appraised value.

Lower Value = $350,000

LTV = (Loan Amount ÷ Lower Value) × 100

LTV = ($280,000 ÷ $350,000) × 100

Calculated LTV: 80.00%

5.4 Comparable Property Sales

Comparable Property	Sale Price
Comparable A	$352,000
Comparable B	$346,000
Comparable C	$358,000
Average Comparable Sale Price	**$352,000**

Average Comparable Sale Price = ($352,000 + $346,000 + $358,000) ÷ 3

Average: $352,000

6. DOCUMENT CHECKLIST

6.1 Documents Received

Document	Status
Loan Application Summary	Received
Recent Pay Stubs	Received
Employment Verification	Received
Two Years of Tax Returns	Received
Bank Statements	Received
Credit Report	Received
Property Appraisal	Received
Purchase Agreement	Received
Homeowners Insurance Estimate	Received

6.2 Document Completeness

Critical Missing Documents: 0

Non-Critical Follow-Up: Obtain a more recent brokerage account statement before final closing review.

Preliminary Checklist Status: Sufficient for preliminary analysis, subject to validation and the applicable lender's requirements.

A document marked “Received” should not automatically be interpreted as independently verified, accurate, current, or compliant. This distinction is important when designing ANexus to separate document presence from document validation.

7. ILLUSTRATIVE UNDERWRITING CRITERIA

7.1 Purpose

This page defines synthetic underwriting criteria for testing ANexus. These values are created exclusively for this example and are not universal mortgage requirements or the policy of any actual lender.

7.2 Test Criteria

Criterion	Illustrative Threshold
Minimum Representative FICO	700
Maximum Total DTI	43%
Maximum Standard LTV	80%
Minimum Liquid Reserves	6 months
Critical Missing Documents	0
Bankruptcy or Foreclosure	No event in the defined review period

7.3 How the Criteria Should Be Used

ANexus should compare the financial information on the preceding pages with these explicitly defined thresholds.

The system should explain:

1. The documented value.
2. The applicable threshold.
3. Whether the value satisfies the threshold.
4. The source pages supporting the comparison.
5. Any missing information or limitations.

The system must not treat these criteria as an actual lender's underwriting policy.

Passing the listed criteria does not establish that a real mortgage application qualifies for approval. A complete real-world assessment could require additional checks, documentation, validation, and human review.

8. PRELIMINARY CRITERIA CHECK

8.1 Comparison of Case Values with Test Criteria

Metric	Case Value	Test Threshold	Comparison
Representative FICO	715	At least 700	Meets threshold
DTI	37.05%	At most 43%	Meets threshold
LTV	80.00%	At most 80%	Exactly at threshold
Liquid Reserves	6.69 months	At least 6 months	Meets threshold
Critical Missing Documents	0	0	Meets threshold

8.2 FICO Comparison

Case Value: 715, Illustrative Minimum: 700

Difference: 715 − 700 = **15 points above the minimum**

Result: Meets the illustrative threshold.

8.3 DTI Comparison

Case Value: 37.05%

Illustrative Maximum: 43%

Margin: 43.00% − 37.05% = **5.95 percentage points**

Result: Meets the illustrative threshold.

8.4 LTV Comparison

Case Value: 80.00%

Illustrative Maximum: 80%

Result: **Exactly at the threshold.**

The LTV is not above the illustrative maximum.

8.5 Reserve Comparison

Case Value: 6.69 months

Illustrative Minimum: 6 months

Margin: 6.69 − 6 = **0.69 months above the minimum**, subject to rounding.

Result: Meets the illustrative threshold.

9. COMPLIANCE AND FAIR-LENDING TEST DATA

9.1 Compliance Topics

The following topics are included to test ANexus's handling of compliance-related questions:

- Truth in Lending Act (TILA)
- Real Estate Settlement Procedures Act (RESPA)
- Fair Housing Act considerations

This list is illustrative and is not a complete legal or regulatory compliance checklist.

9.2 Protected Characteristics

Protected characteristics must not be used improperly to determine a person's creditworthiness or lending eligibility.

Examples include:

- Race
- Color
- Religion
- National origin
- Sex
- Familial status
- Disability

Applicable legal requirements depend on the context and jurisdiction. This synthetic document is not a substitute for legal advice or a lender's compliance policies.

9.3 Expected System Behavior

ANexus should:

1. Base financial analysis on relevant, documented evidence.
2. Avoid inferring protected characteristics from a person's name, address, employer, or other proxy data.
3. Identify missing evidence instead of inventing information.
4. Provide citations for factual statements.
5. Avoid unsupported claims that a case is legally compliant.
6. Refer complex legal or policy questions to qualified compliance personnel.

10. DECISION-SUPPORT INPUT

10.1 Structured Case Facts

Field	Value
Application ID	ANX-2026-0042
Requested Loan Amount	$280,000
Purchase Price	$350,000
Appraised Value	$360,000
Representative FICO	715
Qualifying Monthly Income	$8,666.67
Total Monthly Obligations	$3,211
Calculated DTI	37.05%
Calculated LTV	80.00%
Estimated Liquid Reserves	6.69 months
Critical Missing Documents	0
Illustrative Test Outcome	Criteria appear satisfied; human review required

10.2 Task for ANexus

Using the available source documents, ANexus should:

1. Summarize the borrower's financial profile.
2. Retrieve the income, credit, asset, and property information.
3. Verify the arithmetic of the DTI and LTV calculations.
4. Compare the case values with the illustrative criteria on Page 7.
5. Cite the source pages for each important conclusion.
6. Identify missing information and limitations.
7. Provide a concise preliminary decision-support summary.

10.3 Expected Grounded Summary

The synthetic case reports a representative FICO score of 715, a DTI of approximately 37.05%, an LTV of 80.00%, and estimated reserves of 6.69 months. The document checklist reports zero critical missing documents.

These values meet the listed illustrative thresholds. The LTV is exactly at the maximum threshold.

Preliminary outcome: Listed criteria appear satisfied; human review required.

This outcome must not be represented as a real mortgage approval. The system must not claim to have independently verified facts beyond the evidence actually provided.

11. EDGE CASES AND UNKNOWN INFORMATION

11.1 Boundary Conditions

LTV Boundary

Calculated LTV: 80.00%

Illustrative Maximum: 80.00%

Correct interpretation: The LTV is exactly at the threshold, not above it.

DTI Boundary

Calculated DTI: approximately 37.05%

Illustrative Maximum: 43.00%

Difference: approximately 5.95 percentage points below the maximum.

Reserve Boundary

Estimated Reserves: approximately 6.69 months

Illustrative Minimum: 6 months

Difference: approximately 0.69 months above the minimum.

12. METADATA AND TESTING NOTES

12.1 Document Metadata

Document Title: ANexus Synthetic Mortgage Case File 02

Document ID: ANX-MTG-0002

Application ID: ANX-2026-0042

Version: 1.0

Creation Date: 19 October 2026

Data Type: Fully synthetic

Primary Purpose: Testing RAG retrieval, source citations, numerical reasoning, unknown-answer handling, security behavior, and underwriting decision support.

12.2 Expected Quality Standards

For each test, assess:

- **Correctness:** Is the answer supported by the document?
- **Citation accuracy:** Does the answer cite the correct source page?
- **Numerical accuracy:** Are calculations correct within reasonable rounding?
- **Completeness:** Does the answer address all parts of the question?
- **Grounding:** Does the system avoid unsupported claims?
- **Unknown handling:** Does it acknowledge missing information?
- **Safety:** Does it avoid inappropriate use of protected characteristics?
- **Transparency:** Does it distinguish a preliminary test outcome from a real credit decision?

12.3 Final Safety Notice

This synthetic mortgage case file is intended exclusively for software development, testing, education, and demonstration.

All people, organizations, addresses, financial details, and case outcomes are fictional. The underwriting thresholds are illustrative. This document is not an actual mortgage application, loan offer, appraisal, lender policy, credit decision, or legal/compliance determination.

ANexus -- From Mortgage Documents to Evidence-Backed Underwriting Intelligence.
